DESIGN REVIEW COMMISSION APPLICATION FORM
SUPPLEMENTAL INFORMATION SHEET V
SATELLITE ANTENNAS/COMMUNICATION DEVICES

For design guidelines see: Municipal Code Title 80, Title 86, and the “*Orange Avenue Corridor Specific Plan*”.

The City’s process for installation of a satellite dish antenna or communication device requires a public hearing before the Design Review Commission. In order to assist the Coronado Design Review Commission in properly evaluating requests for approval of proposed satellite antenna(s) or communication device(s), the following information is required:

(turn this page over for further requirements)

Address of Project: _____

Identify the type and quantities of antenna(s) proposed: _____

Identify the location of the antenna(s): _____

Identify the proposed method of screening the antenna(s): _____

Identify the heights, sizes, materials, and colors of the antenna(s): _____

Any additional information: _____

Nine (9) copies of the following:

1. Plot plan showing property dimensions and location of proposed antenna(s) in relationship to property line.
2. Building elevations showing appearance of building with antenna(s) from north, south, east and west elevations. Photo simulations or perspective drawings are encouraged to clarify proposal.
3. Line of site drawings depicting extent of visibility of antenna(s) at various distances.
4. Details of antenna(s) depicting appearance, colors, materials, and sizes.
5. Proposed methods of screening antenna(s) from public view.
6. Colored elevations of building with antenna(s).

One (1) copy of the following:

1. Completed Unified Application Form
2. Completed Supplemental Form for Satellite Antenna(s)/Communication Device(s)
3. Photographs of project site and surrounding properties.
4. Samples of project materials and colors.
5. One set of addressed stamped envelopes and a list of all property owners and occupants within 300 feet of subject property taken off the current property tax assessment roll.
6. Site specific Power Density EMF Study showing compliance with FCC requirements/limits. All existing co-located antennas shall be included to show cumulative impacts.
